PAUL J. HOWARD'S
*Flower Seed
Novelties for 1938*

CALLIOPSIS. Golden Crown. All-America Selection.

A strong growing annual producing beautiful semi-double flowers of rich orange yellow with small rich brown center. It has a pleasing fragrance and is nice for cutting, with twelve inch wiry stems. **Packet, 25c.**

PETUNIA. Salmon Supreme. All-America Selection.

A hybrida nana or dwarf bedding variety of distinct new, bright salmon color in this type. Flowers are about 1½ inches across, plants grow about 12 inches high and wide but apt to grow more late in the season. It is striking in color and of excellent habit. **Packet, 50c.**

PETUNIA. All Double Giants. (Victorious). All-American Selection. Mixed.

A new Giant All-Double flowered variety. Makes sturdy strong well branched upright plants covered with purple veined double frilled flowers. The plant is semi-dwarf in habit with flowers 3½ inches across and blooms over a long season. **Packet, \$1.00.** (Approximately 150 Seeds)

TAHOKA DAISY. Annual.

Free flowering plants of bushy habit and about eighteen inches high. The foliage is fine and feathery covered with masses of lilac blue, yellow-eyed daisies. It is fast growing and early blooming and a good cut flower. **Packet, 25c.**

TITHONIA SPECIOSA GRANDIFLORA FIREBALL.

Fireball is, undoubtedly, the last word in brilliance of color in a fall blooming plant. Many who have known and enjoyed the orange Tithonia have considered it the brightest possible flower for fall use. Fireball is a brilliant vibrant shade of scarlet orange and the flower has a clear yellow center. The plants are about 6 feet high, bushy, and the flowers are carried on fine long stems. Fine as a background subject. **Packet, 25c.**

NEW ANNUAL SCABIOSA—Rosette.

Rosette is a beautiful shade of deep rose heavily suffused with salmon. This glorious glowing new color will make this Scabiosa a most popular flower for the garden and for cutting. **Packet, 25c.**

ZINNIA. Gaillardia Flowered. NAVAJO.

A new Zinnia cross which resembles the double Gaillardia in form. The flowers are very attractive, of medium size, about two inches in diameter, just a good size for cut flower use, and are carried on stems of medium length. The colors range through the mellow tones of rose, pink, bronze, yellow, orange, lavender and combinations of these colors. Most of the flowers are two toned, with a ring of deeper color towards the center of the flower. Flowers are produced about 45 days after seeding. **Packet, 25c.**

ZINNIA LILLIPUT. Tom Thumb.

Dwarf compact plants 4 to 6 inches in height covered with well formed flowers of miniature button type. Colors range through the red, orange, yellow, pink, rose and other pastel shades. An excellent border subject. **Mixed. Packet, 25c.**

RUDBECKIA—Kelvedon Star.

Kelvedon Star is a beautiful new variety with deep golden yellow flowers with a mahogany zone and dark brown center, on stiff stems from twelve to eighteen inches long. The flowers are interestingly variable, some with a larger mahogany zone, and some with two rows of petals, others have petals with an artistic twist. The plants are upright and neat in appearance. **Pkt. 25c.**

COSMOS—Sensation.

Award of Merit. 1936 All American Selections.

The flowers are mammoth in size, 4 to 5 inches in diameter, with broad, heavy fluted petals carried on very long stems. It is extremely early flowering, blooming in ten weeks from the time of seeding. In mixture only containing shades of white, rose and pink. **Packet, 25c.**

SNAPDRAGON. Celestial. All-America Selection.

The plant is of the strong Majestic type, and the beautiful salmon-rose flowers are carried on broad, compact 10 inch spikes. This is not a rust-resistant type, but if the seed is planted in spring and the plant grown in a fast manner in a warm situation very little of the fungus will attack. **Packet, 50c.**

AGERATUM—Blue Ball Improved.

This strain is the result of many years' careful selection for form and dwarfness, plus size and richness of color in this flower. The plants are compact and about four inches high. The growth is most uniform and even. The broad green foliage is almost completely smothered with flowers of the richest shade of blue. **Packet, 25c.**

MARIGOLD—Sunset Giants.

Not only are the flowers the largest ever known in the Marigold group averaging 5 inches and some flowers attaining a size of 7½ inches, but they are produced in such profusion that a plant of Sunset Giants is one of the showiest spots in any garden. The flowers are loosely formed, very full centered, with broad, heavy petals gracefully overlapping to make a flower of great depth even larger than Dahlia Flowered Zinnias. Sunset Giants is a mixture ranging from deep orange through golden orange, deep golden yellow, light yellow, lemon yellow, and a delightful new shade of primrose. Some variation in size may be expected, but they will average 65% double. **Packet, 25c.**

FRAGRANT MARIGOLDS.

CROWN OF GOLD. Gold Medal 1937 All America Selections. An entirely new type of Marigold with a plant entirely free of the pungent odor common to these flowers. The flowers are attractive and interesting in formation, having a cushion center made up of slender interlaced petals, surrounded by a ring of broad ray petals. The color is orange throughout. Very free flowering on plants about 2½ feet high. **Packet, 25c.**

YELLOW SUPREME. A striking new variety which has already proved its worth. On vigorous, freely-branching plants about 2½ feet high, it produces large fluffy, well-rounded flowers with broad, loose, full petals of a rich creamy lemon-yellow color and having a delicately mild honey-like fragrance. Besides being a splendid garden plant Yellow Supreme is excellent as a cut flower, easily lasting a week or more in water. **Packet, 25c.**

DWARF FRENCH MARIGOLD—Double Harmony.

A very charming and distinct type. The flowers are quite different from any other marigold, it is Scabiosa-like in formation with tubular deep orange center petals flanked by broad velvety dark maroon guard petals. The plants are dwarf, about a foot high, compact, and extremely free blooming. **Packet, 25c.**

PETUNIA—Dainty Lady.

Award of Merit 1936, All America Selections

THE NEW YELLOW PETUNIA. The flowers are of medium size and daintily fringed, delicate light yellow deepening to golden yellow at the throat. The plants are neat, compact, upright in habit, semi-dwarf and very free flowering. Dainty Lady is excellent for border use, for bedding, for use in window boxes, and as a cut flower. **Packet, 50c.**

MORNING GLORY—Heavenly Blue.

IMPROVED STRAIN. For quickly covering fences, trellises or pillars, this brilliant new Morning Glory, or "Blue Moonflower" as it is often called, is one of the loveliest subjects imaginable. This improved strain is earlier flowering, giving a longer season of bloom. The color is a deep, intense blue shading lighter toward the center, the flowers very large and have an added virtue of remaining open until late in the afternoon. **Packet, 25c.**

TRANSVAAL DAISY.

GERBERA. New Flowerland Transvaal Daisy. The Flowerland Gerbera is a new selected strain producing flowers four to five inches in diameter on stems two to two and one-half feet long. This strain contains many new shades not found in the ordinary Gerberas: pastel shades of Salmon, Rose, Pink, Carmine, White, Cream, Straw, Yellow, Orange, Crimson, Scarlet, Terra Cotta, etc. The plants are of very robust habit. **Packet, 25c.**

We have a limited amount of seed from our selected stock bed, of choicest and largest flowers, surplus over the amount we will replant for our own growing. Packet, 50c.

Chinese Woolflower in a new color.

CELOSIA CHILDSII—Old Rose.

A most beautiful art-shade is this new color in Celosias, one that lends itself to perfection in floral arrangements. Old Rose, with a toning of russet-orange, best describes the soft but pronounced color of these blossoms. The flower heads, like balls of wool, are on good stems, easy to arrange in vases and baskets. The branching plants grow two to three feet high, and, like other Celosias, are very showy in the garden. Plant them in a sunny place. **Packet, 25c.**

NEW SCABIOSA FLOWERED ZINNIA.

AUTUMN TINTS. Scabiosa flowered Zinnias are becoming increasingly popular. They make a good cut flower, graceful and easy to arrange. This strain which we have named "Autumn Tints" is perfect in form of flowers and comes true. The real beauty, however, is in the lovely coloring of the flowers, which range through all the gorgeous autumn foliage tints, orange, bronze, russet, dull red, carmine, red, terra cotta and intermediate shades. **Packet, 25c.**

Many of the Choicest Strains of Seed which we could formerly only gather in sufficient quantities for the raising of our fine annual and perennial plants, and for limited distribution in Southern California, we now make available for gardens all over the world—for those who desire excellence in floral beauty. It costs much more to produce, but only little if any more to buy and no more to grow the best.

**Paul J. Howard's
PRIZE PANSIES**

The huge size and rich colorings of their blossoms and the length of their stems have given them premier place among Pansies or cut flowers, and the vigor of the plants makes them unequalled for bedding. Realizing that the best flowers can be had only by planting the most carefully selected strains of seed we offer the finest obtainable in each of several types.

PAUL J. HOWARD'S SUPER SWISS GIANTS. This is becoming the most popular of all for show purposes, for gorgeous beds and for use as cut flowers in corsages or bowls. They are of huge size, with long stems, and display a range of color not found in any other type. This is the original true strain, highly improved, not to be compared with ordinary "Swiss Giants" usually offered. Packet, 50c.

PAUL J. HOWARD'S GIANTS OF CALIFORNIA. The size of flowers in this fine strain is equal to any produced in Europe; the difference in colorings and shape of the flowers in this American type distinguishes them from the European. They contain a wider range of lighter blues, bronzes, yellows and mahogany shades, and the petals are more of solid colors, while the Swiss types usually have darker center petals, with brighter colored borders. Many gardeners and florists prefer the American types. Packet, 50c.

FLOWERLAND SPECIAL MIXTURE. The color range is very wide and bright, and these bedding pansies are exceedingly free flowering and remain in bloom over an exceptionally long season, making them unexcelled for bright bedding effects. Packet, 25c.

SWISS GIANT BLUE. Immense deep blue flowers with blue-black centers. Packet, 35c.

SWISS GIANT RED. Rich shades of cardinal and garnet. Packet, 35c.

SWISS WHITE. Packet, 35c.

SWISS GIANT YELLOW. Rich yellow with dark brown blotches on the lower petals. Packet, 35c.

PAUL J. HOWARD'S BRILLIANT BEDDING PANSIES. For beds of solid color their profusion of bloom makes them most desirable.

Emperor William. Rich metallic blue. Packet, 25c.

Golden Queen. Brilliant yellow. Packet, 25c.

Orange King. Deep orange. Packet, 25c.

White Queen. Pure white. Packet, 25c.

PHLOX

PHLOX DRUMMONDI. Unexcelled for a continuous show of color. Crimson, scarlet, flesh pink, rose, lilac, violet-blue, primrose, white, and mixed. **Packet 15c; 6 packets for 75c; 1 ounce \$1.25.**

ART SHADES. Award of Merit. All America Selections. A new strain of Phlox drummondii with flowers an inch and a quarter to an inch and a half in diameter. It has a most wonderful range of color in soft art shades, salmon, light pink, soft rose, light blue, pale violet, light mauve, and many other pleasing art shades. The plants stand about nine inches high. **Packet, 25c.**

STAR-PHLOX. Clusters of star-shaped flowers in a wide variety of colors. Plants of same habit as P. drummondii. Finest mixed. **Packet, 15c.**

Roses for 1938

The Finest Roses to Be Had the Year Around

We have selected from our fields only the heaviest, strongest two-year-old plants, budded on special root-stocks which form vigorous branching root systems supplying extra strength to the well developed tops.

For planting throughout the year, and when dormant plants are not available, these superior bushes, too large to put in the commonly used gallon cans, we have planted in large containers with especially prepared soil to bring to your garden the best roses obtainable.

These larger bushes may be selected in full bloom. From them you may gather flowers for your table immediately, and throughout the season.

Notwithstanding the greater expense of producing these far superior roses, their price is scarcely more than you would pay for ordinary bushes.

PAUL J. HOWARD'S

Flowerland
Fuchsias

An unexcelled collection gathered from World Wide sources. Specimen sizes of the following choice varieties and many other worthy ones in bloom from spring until winter. Visit our display for a rare treat.

Beautiful Novelties for This Season

BABY BUNTING. Charming new color combination—true pink and lavender. A dainty variety suitable for pots, baskets, and front row in the garden. Very prettily formed single flowers. \$1.00.

CASCADE. Sensational novelty which has no equal as basket type. Of perfect pendant habit, relatively small plants in eight-inch pots often have more than 200 flowers on them at one time. The masses of large flowers form a display of lovely bright rose and coral. Notable, too, for its very long sepals. 50c.

SUNSET. Beautiful hybrid of Aurora Superba and Rolla. Soft shrimp pink flowers, with orange sheen, of perfect single form, have a delightful quality that makes it an outstanding new variety. Foliage is large, clean, bright green. \$1.00.

LEVERKUSEN. Triphylla hybrid, with larger tube and flowers than any we have seen in this class. Very showy, free flowering rosy salmon. 75c.

MME. AUBIN. Bright orange red and orange yellow. Handsome foliage and good bloomer. 50c.

MME. CARNOT. Very large full double pink flowers with red sepals. A better flower than Fascination. 50c.

We have other new varieties of lovely Fuchsias in limited number of each. Visit Flowerland in Fuchsia season (April to October).

Hardier, Thin-skinned Varieties (Mexican)

BENEDICT. Originated in Northern California, hardy to cold and heat. Not damaged anywhere, to our knowledge, by last year's freeze. Precocious, prolific, regular bearer of fine quality 7-ounce black fruit. Particularly recommended for San Fernando Valley and similar "interior" districts. Ripens, Sept., Oct.

DUKE. Similar to Benedict in hardiness, green fruit like small Fuerte, excellent quality. September to November.

GANTER. Green, medium sized, good quality and flavor. October to December.

LEUCADIA. Beautiful purplish black fruit, larger than Puebla, considered of superior flavor. Best adapted to coastal and foothill areas. October and November.

PUEBLA. Second in commercial importance to Fuerte in winter ripening varieties. Purple-black excellent fruit. Not suited to interior districts or directly on coast. November to February.

Thick Skinned Avocados

Best near coast and protected foothill regions.

FUERTE. The leading California variety. Green, leathery skinned, pear shaped, rich, buttery texture. November to April.

NABAL. The leading summer ripening fruit. Green, larger and more rounded than Fuerte. Excellent quality. June to September.

RYAN. Green skinned, similar in size and shape to Fuerte, but ripening in summer. Particularly valuable for regular bearing of heavy crops. May to September. **Price \$3.50.**

ANAHEIM. Most consistent and heavy producer of thick-skinned Avocados. Green, large fruit ripening May to August.

QUEEN. A very large purple-black pear shaped fruit of such exceptionally fine quality it should be included in all plantings. Although large in size it is a popular market variety. April to September.

NIMLIOH. Every Avocado fancier in coastal or foothill regions should have one of these trees. The enormous fruits weighing 2½ to 3 pounds, looking like a green football, are not only extremely interesting, but are of most excellent quality. May to August.

LINDA. Another fruit too large for ready market but fine for home use. Deep purple in color of very good quality. May to October.

PAUL J. HOWARD'S
RARE AND BEAUTIFUL

Tall Bearded Iris

If you are an Iris fancier, you know the joy of growing these lovely flowers and the thrill that accompanies the first sight of the newly opened flowers of your latest acquisitions. If you have not grown the newer varieties, plant some this season and you will most likely become a regular Iris "Fan".

There is no other group of flowers that combines as many lovely colorings, and varied perfumes, with flowers of such charming form. They really rival orchids in beauty and yet are among the easiest flowers to grow.

For cut flowers and for landscape effects Iris are indispensable in the garden.

PRESIDENT PILKINGTON. An elegant flower whose beauty is impossible to describe. The glorious coloring is a blend of pale buff with a bluish suffusion in the standards. Falls are wide and flaring, soft lavender-blue suffused buff and edged silvery brown. The flowers are large and bold, stalks medium tall, well branched, set with many buds. 4 feet. **Each, 75c; 3 for \$2.00.**

PLURABELLE. An enchanting Iris of rare and distinct coloring. Standards pure golden yellow, falls exquisitely blended gold and pinkish mauve. The elegant flowers are borne on graceful branching stems, many buds opening at one time. A jewel in the garden. 38 in. **Each \$4.00.**

NEMO. A very vigorous and free flowering Iris of desirable color. Borne on well branched-stems 4 feet high they are soft violet blue self, fragrant and effective. **Each, 75c; 3 for \$2.00.**

MINISTRE FERNAND DAVID. A very large flower of perfect shape and rich velvety substance. Standards luminous rose-lake. Falls warm, intense dark brownish violet. A rare variety whose richness of color is very outstanding. 3 ft. **Each, \$2.50.**

CHARMEUR. Delightfully fresh and new in coloring this dainty Iris will be largely planted for landscape effect and orchid-like cut flowers. The flowers are of good size, delicate orchid-pink color. 2½ ft. **Each, \$1.50; 3 for \$3.50.**

GENEVIEVE SEROUGE. A magnificent new French introduction given a Special Award by the National Horticultural Society of France. It is a blending of lovely pastel tints. Standards tawny yellow, flushed pale blue; falls lilac blended light flax blue, edged with soft yellow. The charming flowers are very large on strong, well branched stems, 3½ ft. high. **Each, \$5.00.**

ANNE-MARIE CAYEUX. An outstanding and lovely French origination distinctly different in coloring. The beautifully blended smooth, soft color tones of this flower are indescribable. Says the originator—"a delicate blending of the sky's colors at sunset and the iridescence of pigeons throat"—a wonderfully beautiful effect of soft rosy heliotrope, greyish amber and orange. 3 ft. **Each, 75c; 3 for \$2.00.**

ELECTRE. A delightful new French Iris. Standards soft bluish lavender with a soft glow of gold; falls of the same color. Quite different from any other, and very charming. 3 ft. **Each, \$2.50.**

FRANCHEVILLE. Enormous flowers of striking effect, on tall branching stems. Standards fawn tinged lilac, falls purple, edged with lavender-brown, brown lines radiating from the bright orange beard. 4½ ft. **Each, \$1.00.**

FRIVOLITE. A delightful French Iris with unique coloring. Lustrous lavender-pink, with salmon tints and a golden glint at the base of the falls. 2½ ft. **Each, 75c; 3 for \$2.00.**

SITKA. Splendid pure white, beautifully formed flowers of huge size. A prolific bloomer giving a marvellous effect. 4 ft. **Each, 75c.**

NATIVIDAD. Unusual in beauty; creamy white, lighted soft yellow in center, glistening as if sprinkled with dew. Long blooming period. 3 ft. **Each, \$1.50.**

EASTER MORN. A superior giant white Iris, warmed by a touch of yellow in the center. It has wide flaring falls of unusual substance. Very vigorous growing. 4 ft. **Each, \$1.00**

A GREAT ADVANCEMENT IN YELLOW IRIS

Two Grand Sydney B. Mitchell Hybrids

Freely praised throughout the country, East and West by Iris enthusiasts, California Gold and Happy Days have set a marvellous record of achievement. Large, and perfect in form, they are an outstanding feature in any garden.

CALIFORNIA GOLD. Rich deep yellow, a shade deeper than Happy Days. Fine branching stems of medium height. A most beautiful clear yellow flower that does not fade. 30 inches. **Each, \$7.50.**

HAPPY DAYS. A triumph for the great Iris breeder, Sydney B. Mitchell. Startlingly beautiful, immense clear yellow flowers are held aloft on tall branching stems, each stem carrying seven or eight massive blooms. Yellow Iris bring out the full beauty of any Iris garden, and Happy Days will make a most brilliant spot in any collection. 40 inches. **Each, \$7.50.**

ECLADOR. A Dykes Memorial Medal winner, the highest award that can be given to an Iris. It is the most sensational of the newer yellow Iris, the flowers of giant size and fine substance, deep golden yellow. Not as tall as the two wonderful new Mitchell Iris, California Gold and Happy Days, but deeper in color with a rich velvety sheen to the falls. A very vigorous grower, with strong, well branched stems. Height 3½ ft. **Each, \$5.00.**

ALICE HARDING. One of the finest new soft yellow Irises with large well balanced flowers of the best form and substance. The standards are soft primrose yellow; the falls are the same tone with a faint blending of greyish buff at the base, illuminated by the conspicuous orange beard. A French hybrid quite distinct from the new California originations. 4 ft. **Each, \$5.00.**

MANDARIN. A very fine flower of pure deep golden yellow. A lively and distinctive flower. **Each, \$4.00.**

Note: Iris Established in 1-gallon containers, for planting any time of year to bloom following Spring 15c each higher than listed prices.

SPECIAL COLLECTION NO. 2—

One each of the above ten Iris for \$1.80

IRIS FOETIDISSIMA

For Decorative Seed-pods

Most striking are the seed-pods of this variety which burst open and display rows of orange-red berries. As decorative material for cutting there are few things more effective. The clumps are ever-green, making attractive features in the garden with their broad, deep green foliage. **4-inch pots, 35c; 10 for \$3.15.**

JAPANESE IRIS

IRIS KAEMPFERI. A most beautiful class of iris with large flat flowers, 8 to 10 inches across. The colors are very rich, including blue, lavender, mauve, purple and white.

Mixed colors 50c each; 10 for \$4.50

Note: Iris Established in 1-gallon containers, for planting any time of year to bloom following Spring 15c each higher than listed prices.
